## Connections

## External Connections

External Connection (Connector and connector screws are provided with the model.)

## Conformance to EN/IEC Standards

To ensure conformance to EN/IEC standards in machinery that incorporates the K3TG, ensure that input signal lines are less than 30 m .

Note: 1. Terminals 2 and 3 and 10 are not internally insulated. Connect a relay with high contact reliability and insulation (with a minimum load current of 0.3 mA ) or a photocoupler with high insulation (with a residual voltage of 1 V max. and a current leakage of 0.1 mA max.) to these terminals for external control. The use of an independent power supply is recommended for the Digital Panel Meter.
2. Terminal 8 is not used. Do not use this terminal for transmission of signals.

## Nomenclature

## Dimensions

Note: All units are in millimeters unless otherwise indicated.

Panel Cutouts

LED Indicator Size

Note: The values above are recommended values. Do not group-mount the meters at intervals less than the recommended ones.

## Application Examples

High DC Voltage Measurement
When voltage exceeding the maximum voltage in the standard range is measured (for example: more than 200 V ), a divider is connected externally.

## Safety Precautions

## Precautions for Correct Use

Refer to Safety Precautions for All Digital Panel Meters.

## Mounting

Recommended panel thickness is 1 to 3.2 mm .
Mount the Digital Panel Meter by attaching the mounting bracket supplied as an accessory from the rear of the Digital Panel Meter and hooking the mounting bracket to the Digital Panel Meter securely.
Tighten the mounting screws by turning them clockwise with a tightening torque of $4 \mathrm{kgf} \cdot \mathrm{cm}(0.39 \mathrm{~N} \cdot \mathrm{~m})$.
To dismount the Digital Panel Meter, loosen the screws and widen the hooks.
Mount the Digital Panel Meter as horizontally as possible

## Calibration

Calibrate the Digital Panel Meter regularly so that the Digital Panel Meter can maintain processing accuracy.

Use a standard signal generator with an accuracy of 99.99\% min. for calibration.

For the precise calibration methods, refer to the Instruction Sheet for the Digital Panel Meter.

## Control Power Supply

Use a control power supply with a ripple rate of $10 \%$ max.

## Accessories (Order Separately)

## Water-resistive Soft Front Cover

Before mounting the Digital Panel Meter to a panel, attach the waterresistive soft front cover and mounting bracket to the Digital Panel Meter properly so that the Digital Panel Meter will maintain IP51 water-resistive standards.

ote: Be sure to use the Water-resistive Soft Front Cover and mounting bracket together.
